

BOX INSPIRATION #4

Bespoke Container Windows

Welcome to the fourth issue of Box Inspiration, your weekly dose of fresh container conversion ideas. This week we show you how container windows can come in all shapes and sizes.

Windows are ideal if you regularly use your container, and require natural light. We will work with you to decide where best to place the windows, and are able to supply and fit standard anti-vandal windows into offices and canteens, as well as bespoke fixed frame windows.

Do you remember boomboxes?

One of our favourite jobs which incorporated bespoke windows was for a skatepark in Hereford. We built a two-tier structure made out of two new 40ft containers in order to replicate an '80s-style boombox, this accommodated a shop area and canteen area. Circular custom built windows were designed and installed, in order to give the appearance of boombox speakers, and these were surrounded with a powder coated black steel mesh. As well as this, rectangular custom built windows were also designed and installed in order to give the appearance of cassette decks.
